Table DF - 2

Capital Adequacy

Qualitative Disclosures:

A. A summary discussion of the Bank's approach to assessing the adequacy of its capital to support current and future activities.

In order to strengthen the capital base of banks in India, the Reserve Bank of India in April 1992 introduced capital adequacy measures in banks, based on the capital adequacy framework (Basel I) issued by Basel Committee on Banking Supervision (BCBS). Initially, the framework addressed capital for credit risk, which was subsequently amended to include capital for market risk as well. The Bank has been compliant with regard to maintenance of minimum capital for credit and market risks.

Subsequently, the BCBS has released the "International Convergence of Capital Measurement and Capital Standards: A Revised Framework" (popularly known as Basel II document) on June 26, 2004. Reserve Bank of India has issued final guidelines on April 27, 2007 for implementation of the New Capital Adequacy (Basel II) Framework.

In line with the RBI guidelines, the Bank has successfully migrated to the revised framework (Basel-II) from 31.03.2009. The Bank has continued the Parallel run of Basel II framework continuously tracking the exposures and studied the impact on Bank's Capital to Risk weighted Assets Ratio (CRAR) on a quarterly basis.

Reserve Bank of India issued Guidelines based on the Basel III reforms on capital regulation during May 2012, to the extent applicable to banks operating in India. The Basel III capital regulation has been implemented from April 01, 2013 in India in phases and it was decided originally to implement fully as on March 31, 2018. RBI issued detailed Guidelines on Composition of Capital Disclosure Requirements on May 28, 2013. Another circular on "Implementation of Basel III Capital Regulations in India – Capital Planning" has been issued by RBI on March 27, 2014. Accordingly, the transitional period for full implementation of Basel III Capital Regulations on Capital Regulations in India is extended upto March 31, 2019, instead of as on March 31, 2018. Another circular on "Prudential Guidelines on Capital Adequacy and Liquidity Standards – Amendments" has been issued by RBI on 31.03.2015. The Basel III Capital Regulations have been consolidated in Master Circular – Basel III Capital Regulations vide circular No. DBOD.No.BP.BC.1/21.06.201/2015-16 dated July 1, 2015.

Under the Basel II framework, the total regulatory capital comprises of Tier I (core capital) and Tier 2 capital (supplementary capital). In order to improve the quality of regulatory capital, the capital will predominantly consist of Common Equity Tier1 (CET1) under Basel III. Non-equity Tier 1 and Tier 2 capital would continue to form part of regulatory capital subject to eligibility criteria as laid down in Basel III. The Basel III capital regulations continue to be based on three-mutually reinforcing Pillars, viz. Minimum Capital Requirements (Pillar 1), Supervisory Review of Capital Adequacy (Pillar 2) and Market Discipline (Pillar 3) of the Basel II Capital Adequacy framework.

The Basel-III norms mainly seek to:

- Raise the quality of capital to ensure that the banks are capable to absorb losses on both as going concern and as gone concern basis,
- Increase the risk coverage of the capital framework
- Introduce leverage ratio to serve as a backstop to the risk-based capital measure
- Raise the standards for the supervisory review process and public disclosures etc.

The macro prudential aspects of Basel III are largely enshrined in the capital buffers. Both the buffers i.e. the capital conservation buffer and the countercyclical buffer are intended to protect the banking sector from stressed situations and business cycles.

Minimum capital requirements under Basel-III:

Under the Basel III Capital Regulations, banks are required to maintain a minimum Pillar 1 Capital (Tier-I + Tier-II) to Risk-weighted Assets Ratio (CRAR) of 9% on an on-going basis (other than capital conservation buffer and countercyclical capital buffer etc.) Besides these minimum capital requirements, Basel III also provides for creation of capital conservation buffer (CCB). The CCB requirements are to be implemented from March 31, 2016 in phases and are to be fully implemented by March 31, 2019 to the extent of 2.5% of Risk weighted Assets.

The total regulatory capital fund under Basel- III norms will consist of the sum of the following categories and banks are required to maintain 11.5% of Risk Weighted Assets (9% + 2.5%) by March 2019 with the phase in requirements under CCB from 2016.

- Tier 1 Capital comprises of:-
 - Common Equity Tier 1 capital (with a minimum of 5.5%)
 - Additional Tier 1 capital
 - Total Tier 1 capital of minimum 7%

- Tier 2 Capital.
 - Total Tier 1 + Tier 2 should be more than 9%
- Capital Conservation Buffer (CCB). (with a minimum of 2.5%)
 - Total capital including CCB should be 11.5%

B. The Bank's approach in assessment of capital adequacy

The Bank is following standardized approach, Standardized Duration approach and Basic Indicator approach for measurement of capital charge in respect of credit risk, market risk and operational risk respectively. Besides computing CRAR under the Pillar I requirement, the Bank also periodically undertakes stress testing in various risk areas to assess the impact of stressed scenario or plausible events on asset quality, liquidity, profitability and capital adequacy. The bank conducts Internal Capital Adequacy Assessment Process (ICAAP) on annual basis to assess the sufficiency of its capital funds to cover the risks specified under Pillar- II of Basel guidelines. The adequacy of Bank's capital funds to meet the future business growth is also assessed in the ICAAP document.

C. Quantitative Disclosures:

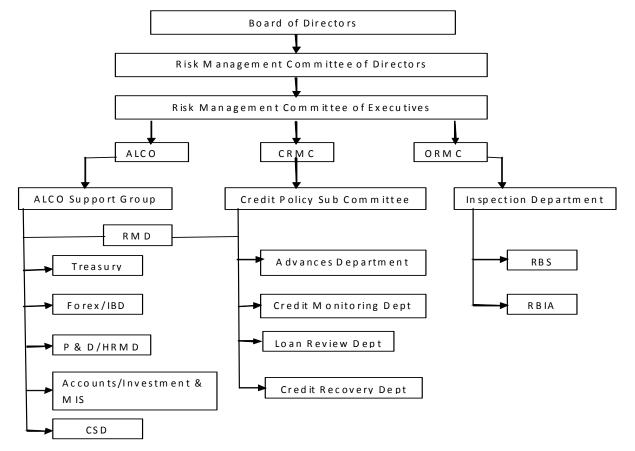

2. Risk Exposure and Assessment

Risk is an integral part of banking business in an ever dynamic environment, which is undergoing radical changes both on the technology front and product offerings. The main risks faced by the bank are credit risk, market risk and operational risk. The bank aims to achieve an optimum balance between risk and return to maximize shareholder value. The relevant information on the various categories of risks faced by the bank is given in the ensuing sections. This information is intended to give market participants a better idea on the risk profile and risk management practices of the bank.

The Bank has a comprehensive risk management system in order to address various risks and has set up an Integrated Risk Management Department (RMD), which is independent of operational departments. Bank has a Risk Management Committee of Board functioning at apex level for formulating, implementing and reviewing bank's risk management measures pertaining to credit, market and operational risks. Apart from the Risk Management Committee of the Board at apex level, the Bank has a strong Bank-wide risk management structure comprising of Risk Management Committee of Executives (RMCE) assisted by Asset Liability Management Committee (ALCO), Credit Risk Management Committee (CRMC) and Operational Risk Management Committee (ORMC) at senior management level. Credit Risk Management Committee deals with credit policies and procedures, Asset Liability Management Committee deals with Asset Liability Management (ALM) and Investment Policy of the Bank and Operational Risk Management Committee formulates policies and procedures for managing operational risks.

The Bank has formulated the required policies such as Integrated Risk Management Policy, Loan Policy, Credit Risk Management Policy, ALM Policy, Treasury and Forex Policy, Inspection and Audit policies, KYC policy, Risk Based Internal Audit Policy, Stress Testing Policy, Disclosure Policy, ICAAP policy and Credit Risk Mitigation & Collateral Management Policy, Risk Rating and Pricing policy, etc for mitigation the risk in various areas and monitoring the same.

The structure and organization of Risk Management functions of the bank is as follows:

<u> TABLE DF – 3</u>

Credit Risk: General Disclosures

Credit Risk:

Credit Risk is a possibility of losses associated with diminution in the credit quality of borrowers or counterparties. In a bank's portfolio, Credit Risk arises mostly from lending activities of the bank, when a borrower is unable to meet its financial obligations emanating from potential changes in the credit quality / worthiness of the borrowers or counterparties.

Credit Risk Management encompasses a host of management techniques, which help the banks in mitigating the adverse impacts of credit risk. The objective of the Credit Risk Management is to identify, measure, monitor and control credit risk by adopting suitable methodology.

The Bank has formulated Loan Policy which stipulates various prudential norms, bench marks, guidelines for sanctioning of credits and recovery of the same. The Bank has also formulated a separate Credit Risk Management Policy, besides a Policy on Credit Risk Mitigation and Collateral Management.

Credit Risk is assessed by a robust internal credit risk rating system. Credit Risk Rating is the process wherein the merits and demerits of a borrower are captured and assigned with scorings, which enables the Bank to take a view on the acceptability or otherwise of any credit proposal.

Credit Risk Management Policy:

The Bank has put in place a well-structured Credit Risk Management Policy duly approved by the Board. The Policy document defines organisation structure, role and responsibilities and the processes whereby the Credit Risks carried by the Bank can be identified, quantified and managed. Credit Risk is monitored on a bank wide basis and the compliance with regard to the risk limits approved by the Credit Risk Management Committee (CRMC)/ Board is ensured.

The Bank adopts the definition of 'past due' and 'impaired credits' (for reporting purposes) as defined by Reserve Bank of India under Income Recognition, Asset Classification and provisioning (IRAC) norms (vide RBI Master Circular dated July 01, 2014).

CREDIT RISK: DISCLOSURES FOR PORTFOLIO SUBJECT TO THE STANDARDISED APPROACH

Qualitative Disclosures

The Bank is using the services of the External Credit Rating Agencies approved by Reserve Bank of India, namely a) CRISIL, b) ICRA, c) CARE, d) FITCH/India Ratings, e) Brickwork and f) SMERA ratings to facilitate the corporate borrower customers who enjoy credit facilities above Rs.5.00 crore to solicit the ratings. The corporates which are yet to get the approved ratings from these rating agencies are treated as 'unrated'.

The Bank computes risk weight on the basis of external rating assigned, both Long Term and Short Term, for the facilities availed by the borrower. The external ratings assigned are generally facility specific. The Bank follows the below mentioned procedures as laid down in the Basel III guidelines for usage of external ratings:

- Rating assigned by one rating agency is used for all the types of claims on the borrowing entity.
- Long term ratings are used for facilities with contractual maturity of one year & above.
- Short term ratings are generally applied for facilities with contractual maturity of less than one year.

Quantitative Disclosures

For exposure amounts after risk mitigation subject to the standardised approach, amount of a bank's outstandings (rated and unrated) in the following three major risk buckets as well as those that are deducted as per risk mitigation are given below.

| | s. in crore | | |
|------------------------------------|-------------|----------|----------|
| Risk Weight | Total | | |
| Below 100 % | 40.73 | 17451.87 | 17492.59 |
| At 100 % | 212.77 | 7259.13 | 7471.90 |
| More than 100 % | 191.25 | 849.64 | 1040.89 |
| Total outstanding after mitigation | 444.75 | 25560.64 | 26005.39 |
| Deducted (as per Risk Mitigation) | 1.20 | 3473.12 | 3474.32 |

<u>TABLE DF – 5</u>

CREDIT RISK MITIGATION: DISCLOSURES FOR STANDARDISED APPROACHES

Qualitative Disclosures

The Bank has put in place Credit Risk Mitigation and Collateral Management Policy with the primary objective of

• Mitigation of Credit Risks and enhancing awareness on identification of appropriate collateral taking into account the spirit of Basel III / RBI guidelines

Optimizing the benefit of Credit Risk Mitigation in computation of capital charge as per the approaches laid down in Basel III / RBI guidelines.

Valuation and methodologies are detailed in Credit Risk Management Policy, Valuation Policy and Loan Policy of the Bank.

The Bank recognises the following Financial Collateral (FC) for Credit Risk Mitigation.

- a) Cash or Cash equivalent (Bank Deposits/Certificate of Deposits issued by the Bank, etc.)
- b) Gold Jewels
- c) Indira Vikas Patras
- d) Kisan Vikas Patras
- e) National Savings Certificates
- f) Life Insurance Policies with a declared surrender value
- g) Securities issued by Central and State Governments
- h) Debt securities rated by a recognized Credit Rating Agency where these are either:
 - at least BBB(-) when issued by public sector entities; or
 - at least A when issued by other entities (including banks and Primary Dealers); or
 - at least PR3/P3/F3/A3 for short term debt instruments
- i) Debt securities not rated by Credit Rating Agency but
 - issued by a bank and
 - listed on a recognized stock exchange; and
 - Classified as senior debt.

The Bank accepts guarantees from individuals with considerable net worth and the Corporates, besides guarantee issued by Government, other Commercial banks, ECGC and CGTSI.

Concentration Risk in Credit Risk Mitigation: All types of securities eligible for mitigation are easily realizable financial securities. As such, presently no limit/ceiling has been prescribed to address the concentration risk in credit risk mitigants recognized by the Bank. The portion of advances subjected to CRM including non-funded advances amounted to 18.00% of outstanding total of funded and non-funded credit. The Bank has ensured legal certainty in the matter of credit risk mitigation as per RBI guidelines.

Quantitative Disclosures

a. For each separately disclosed credit risk portfolio, the total exposure (after, where applicable, on-or off balance sheet netting) that is covered by eligible financial collateral (FCs) after the application of haircuts is given below:

| Portfolio category | Financial collateral | Quantum of exposure covered Rs in crore |
|--------------------|----------------------|--|
| 1. Funded - Credit | Bank's own deposits | 771.16 |
| 2. Funded - Credit | Gold jewels | 2148.72 |
| 3. Funded - Credit | LIC/KVP/NSC | 7.37 |
| 4. Non Funded | Bank's own deposits | 377.19 |

| | b. For each separately disclosed portfolio, the total exposure (after, on balance sheet netting) that is covered by Guarantees: | | | | | |
|--------------------|---|--|--|--|--|--|
| Portfolio category | Guaranteed by | Quantum of exposure covered Rs in crore | | | | |
| 1. Funded - Credit | Central Government | 317.52 | | | | |
| 2. Funded - Credit | ECGC | 115.50 | | | | |
| 3. Funded – Credit | AP State Government | 0.07 | | | | |
| 4. Funded – Credit | CGTSI | 63.36 | | | | |

<u> TABLE DF - 6</u>

Securitization: Disclosure for Standardised Approach

Qualitative Disclosures:

The Bank has not undertaken any securitization activity.

Quantitative Disclosures: NIL

<u> TABLE DF – 7</u>

Market Risk in Trading Book

Qualitative Disclosures:

Market Risk in trading book is assessed as per the Standardised duration method. The capital charge for HFT and AFS is computed as per Reserve Bank of India prudential guidelines.

a. **Definition of market risk:** - Market risk refers to the potential losses arising from volatility in interest rates, foreign exchange rates, equity prices and commodity prices. Market risk arises with respect to all market risk sensitive financial instruments, including securities, foreign exchange contracts, equity and derivative instruments as well as from balance sheet or structural positions.

b. **Portfolios covered under standardized approach:** - The bank's portfolio comprises of Government securities, equity shares and forex portfolio.

c. Strategies and processes

1) The Bank has put in place a comprehensive Market risk management Framework to address the Market risks (bank wide) including that of the Trading Book.

2) Within the above framework, various policies of the Bank prescribes Limits like Value at Risk (VaR) for HFT Securities and Foreign Currencies, Duration, Minimum holding level for liquid assets, Exposure limits, Forex open position limits (day light/overnight), Stop-loss limits etc.

3) Risk profiles are analyzed and the effectiveness of risk mitigants is regularly monitored through Mid Office.

4) Adherence to limits are being monitored by dedicated mid office, reporting exceptions to the head of Risk Management Department, independent of Treasury /IBD operational units.

d. Risk Measurement

1) Values at Risk (VaR) numbers are arrived for Trading book Central Government securities and Foreign Currencies.

2) The positions are marked to market at stipulated intervals. The Duration/Modified Duration is computed and its adherence to the prescribed duration limits is ensured.

3) The Bank is computing capital charge on "Held for Trading" and "Available for Sale" categories using Standardized Duration Approach as required under RBI guidelines.

4) Stress testing analysis is done by applying rate shocks for parallel shift in the yield curve under current economic and political scenario.

Quantitative Disclosures:

The capital requirements for 30.09.2015

| • | Interest Rate Risk | - | Rs. 23.41 crore |
|---|----------------------|---|-----------------|

<u>TABLE DF – 8</u>

OPERATIONAL RISK

Qualitative Disclosures

Operational Risk is the risk of loss resulting from inadequate or failed processes, people and systems or from external events. Operational risk includes legal risk but excludes strategic and reputation risks.

The Bank has put in place Operational Risk Management Policy duly approved by the Board. This policy outlines the Organisation Structure and covers the process of identification, assessment/measurement and control of various operational risks.

The other policies adopted by the Bank which deal with the management of operational risks are Inspection Policy, Information Security Audit Policy and Policy on Modified code of conduct for Know-Your Customer & Anti-Money Laundering Standards.

Operational Risks in the Bank are managed through comprehensive and well-articulated internal control framework. Operational risk is mitigated by effecting suitable insurance coverage wherever necessary. The Bank has also put in place a compliance cell to supervise KYC & AML guidelines and off site monitoring of high value transactions. For accounting operations in the computerized environment suitable internal control system is maintained and a separate policy on I.T. Security is in place specifying the internal guidelines on access, control, communications, operations, personal security, business continuity management etc.

Quantitative Disclosures:

Capital charge for Operational Risk is computed as per the Basic Indicator Approach based on the average of the gross income for the previous three years i.e. 2012-13, 2013-14 and 2014-15 as defined in the Master Circular – Basel III Capital Regulations & New Capital Adequacy Framework guidelines. The required capital is Rs.156.61 crore.

<u> TABLE DF – 9</u>

INTEREST RATE RISK IN THE BANKING BOOK (IRRBB)

Qualitative Disclosures:

Interest rate risk is the risk where changes in the market interest rates might affect a bank's financial condition. Changes in interest rates affect both the current earnings (earnings perspective) as also the net-worth of the Bank (economic value perspective). The risk from earnings perspective can be measured as impact in the Net Interest Income (NII) or Net Interest Margin (NIM). Similarly, the risk from economic value perspective can be measured as drop in the Economic value of Equity (EVE).

The impact on income (earning perspective) is measured through use of Gap Analysis by applying notional rate shock up to 200 bps as prescribed.

For the calculation of impact on earnings, the Traditional Gap is taken from the Rate Sensitivity statement and based on the remaining period from the mid point of a particular bucket, the impact for change in interest rates up to 200 bps is arrived at for one year time horizon.

The Bank has adopted Duration Gap Analysis for assessing the impact (as a percentage) on the Economic Value of Equity (Economic Value Perspective) by applying a notional interest rate shock of 200 bps. As per the draft guidelines issued by RBI DBOD.No. BP. 7/21.04.098/ 2005-06 dated April 17, 2006, the Bank calculates Modified Duration Gap on Assets & Liabilities and arrive at the impact on Economic Value of Equity. On November 04, 2010, RBI issued a circular on Interest Rate Risk using Duration Gap Analysis and these guidelines have also been taken into account while calculating IRRBB. The Bank is calculating IRRBB on a quarterly basis.

Quantitative Disclosures:

a) The impact of change in Interest Rate i.e. Earnings at Risk for 200 bps interest rate shock as on 30.09.2015 is Rs.81.34 crore.

b) The impact of change in market value of Equity for an interest rate shock of 200 bps as on 31.03.2015 is 3.65%.

General disclosures for exposures related to counterparty credit risk

TABLE DF – 10

Counterparty Credit Risk (CCR) is the risk that a counter party to a transaction could default before the final settlement of the transaction cash flows. Unlike a firm's exposure to credit risk through a loan, where the exposure to credit risk is unilateral and only the lending bank faces the risk of loss, CCR creates a bilateral risk of loss to either parties.

Counterparty credit risk in case of derivative contracts arises from the forward contracts. The subsequent credit risk exposures depend on the value of underlying market factors (e.g., interest rates and foreign exchange rates), which can be volatile and uncertain in nature. The Bank does not enter into derivative transactions other than forward contracts.

Credit exposures on forward contracts

The Bank enters into the forward contracts in the normal course of business for proprietary trading and arbitrage purposes, as well as for our own risk management needs, including mitigation of interest rate and foreign currency risk. Derivative exposures are calculated according to the current exposures method.

Counterparty Credit exposure as on September 30, 2015 Rs in crore

| Nature | Notional | Potential | Current | Total credit |
|-------------------|----------|--------------|----------|--------------|
| | Amount | Exposure @2% | exposure | exposure |
| Forward contracts | 4418.92 | 80.58 | 21.33 | 101.91 |

The capital requirement for Bank's exposure to Qualified Central Counter Party (QCCP) has been computed for the exposure to Clearing Corporation of India (CCIL) as on 30.09.2015 amounting to Rs.38.04 crore with risk weighted assets of Rs. 6.79 crore, which is forming part of credit risk total. In terms of RBI circular dated 28.03.2013, the Credit Valuation Adjustment (CVA) risk capital charge has been computed, which amounted to Rs. 0.52 crore (the corresponding risk weighted value of Rs.6.48 crore has also been added to credit risk weighted assets).

| Tota | l Ass | ets | 297700.41 | ↓ ↓ |

Step 2

- 1) As the Bank is not having any subsidiary, no disclosure relating any legal entity for regulatory consolidation is made.
- 2) The entire paid up capital of the Bank amounting to Rs.598.19 million is included in CET I. (refer Item I of DF-11)
- 3) The break up for Reserves & Surplus Rs.28593.83 mn as shown in the Bank's financials statements is given hereunder for the purpose of reconciliation for calculation of Regulatory Capital in DF-11.

| | | Rs .in Million |
|-----------------------------------|----------|---|
| As per Balance Sheet Amo | | As shown in DF-11 Capital |
| a) Statutory reserves | 6910.00 | Included in Regulatory CET I capital DF-11 (S.No.2) |
| b) Capital Reserves | 539.51 | Included in Regulatory CET I capital DF-11 (S.No.2) |
| c) Share Premium | 8051.87 | Included in Regulatory CET I capital DF-11 (S.No.1) |
| d) General reserves | 9295.00 | Included in Regulatory CET I capital DF-11 (S.No.2) |
| e) Investment reserve | 23.80 | Included in Regulatory Tier II capital DF-11(S.No.50) |
| f) Special Revenue under IT | 1510.00 | Included in Regulatory CET I Capital -DF11- S.No. 2) |
| g) Balance in P&L upto 30.09.2015 | 2263.65 | Included Rs.69.61 mn in CET I (S.No. 2- DF11) |
| | 28593.83 | |

- Borrowings The Tier I bonds shown as capital instruments under borrowings (under in step 1 – A(iii) above) has a book value of Rs.400.00mn, but the amount admissible for regulatory Tier II capital after discounts and deductions amounts to only Rs.20.00mn shown in DF-11 (S.No.46).
- 5) Other Liabilities The following subheads are included in Other Liabilities in the Balance Sheet
 - a) Provision for Standard assets Rs.798.50 mn
 - b) Provision for Unhedged Foreign Currency Exposure (UFCE) Rs.4.84 mn
 - c) Provision for Country Risk Exposure Rs.2.20 mn

However they are shown under Tier II capital for computation of Regulatory Capital (S.No.50 - DF-11) as noted in brackets as per extant RBI guidelines.

<u>Table DF-14</u> <u>Full Terms and Conditions of Regulatory Capital Instruments</u> The details of the Tier II capital [Bonds] raised by the Bank

| Table DF-14 : Full Terms and Conditions of Regulatory Capital Instruments | | | | |
|--|--|--|--|--|
| Instruments | Full Terms and Conditions | | | |
| Series I 300 Nos - 8.90% Non Convertible Redeemable Debentures Rs. 10,00,000/- each - Tenure 121 Months, Date of Allotment : 31/03/2006 Date of Redemption : 30/0 aggregating to Rs. 30.00 crores. | | | | |
| Series II | 100 Nos – 10.00% Non Convertible Redeemable Debentures Rs. 10,00,000/- each fully paid up – Tenure 121 Months, Date of Allotment : 30/03/2007 Date of Redemption : 30/04/2017 aggregating to Rs. 10.00 crores. | | | |

Table DF-16: Equities – Disclosure for Banking Book Positions

There are no equity investments as on 30.09.2015 under Banking Book (HTM).

<u>Leverage Ratio</u>

Leverage ratio is a non-risk based measure of all exposures for the Tier-I capital. The leverage ratio is calibrated to act as a credible supplementary measure to the risk based capital requirements. The Basel III leverage ratio is defined as the capital measure (the numerator) divided by the exposure measure (the denominator), with this ratio expressed as a percentage. Presently the indicative benchmark Leverage Ratio prescribed is 4.50% (minimum).

Leverage Ratio = <u>Capital Measure (Tier I Capital)</u> Exposure Measure

| | Table DF 17- Summary comparison ofaccounting assets vs. leverage ratio exposure measure | | | |
|---|--|--------------------------------|--|--|
| | Item | 30.09.2015 (Rs. In Million) | | |
| 1 | Total consolidated assets as per published financial statements | 297700.41 | | |
| 2 | Adjustment for investments in banking, financial, insurance or commercial entities that are consolidated for accounting purposes but outside the scope of regulatory consolidation | (6.77) | | |
| 3 | Adjustment for fiduciary assets recognized on the balance sheet pursuant to the operative accounting framework but excluded from the leverage ratio exposure measure | | | |
| 4 | Adjustments for derivative financial instruments | 1019.10 | | |
| 5 | Adjustment for securities financing transactions (i.e. repos and similar secured lending) | | | |
| 6 | Adjustment for off-balance sheet items (i.e. conversion to credit equivalent amounts of off- balance sheet exposures) | 18475.50 | | |
| 7 | Other adjustments (intangible) | (232.94) | | |
| 8 | Leverage ratio exposure | 316955.30 | | |

| | Table DF 18: Leverage ratio common disclosure template - 30.09.2015 | | |
|----|--|---|--|
| | Item | Leverage ratio framework (Rs. In Million) | |
| | On – balance sheet exposures | | |
| 1 | On-balance sheet items (excluding derivatives and SFTs, but including collateral) | 297700.41 | |
| 2 | (Asset amounts deducted in determining Basel III Tier 1 capital) | (239.71) | |
| 3 | Total on-balance sheet exposures (excluding derivatives and SFTs) (sum of lines 1 and 2) | 297460.70 | |
| | Derivative Exposures | | |
| 4 | Replacement cost associated with all <i>derivatives</i> transactions (i.e. net of eligible cash variation margin) | 1019.10 | |
| 5 | Add-on amounts for PFE associated with <i>all</i> derivatives transactions | | |
| 6 | Gross-up for derivatives collateral provided where deducted from the balance sheet assets pursuant to the operative accounting framework | | |
| 7 | (Deductions of receivables assets for cash variation margin provided in derivatives transactions) | | |
| 8 | (Exempted CCP leg of client-cleared trade exposures) | | |
| 9 | Adjusted effective notional amount of written credit derivatives | | |
| 10 | (Adjusted effective notional offsets and add-on deductions for written credit derivatives) | | |
